ABOUT ME

As an older student with life skills I recently returned to school and complete my Associates in Software Development. This program has given me a understanding in the different roles of web design and web development and has enhanced my critical thinking skills and practical experience. I would like to further enhance my education with a fulfilling employment before I complete an advanced degree.

HOBBIES

Fishing

Hiking

Video
Games

Welding

ACHIEVEMENTS

In the spring of 2014 I fulfilled a personal goal of walking the Camino de Santiago. This 500 mile walking journey in Spain took 47 days to complete. I walked roughly 16 miles a day.

This journey taught me a lot. I learned that I am not a quitter no matter how difficult the journey can get. I wanted to finish the way successfully. I also learned the people you surround yourself with can make all the difference.

SOFTWARE

C#, HTML5, CSS, JavaScript, JQuery, PHP,
MySQL, SQL Server, ASP.NET
